SUZHOU SEAPEAK CO., LTD.

- Product Name: drip irrigation adapter/connector
- Material: PP or POM
- Color: black, blue
- Tube: 4/7 pvc hose
- Origin of Country: China
- Packing: 100pcs each bag / 10bags each carton
- Production: 20,000pcs each day
- Feature: Made of excellent engineering plastics, durable, anti-aging and corrosion-resistant
- Application: used in drip irrigation system

FAQs of Drip Irrigation Adapter Or Connector

Q: Can I connect drip irrigation to sprinkler system by using [drip irrigation adapter](#) or connector?

A: For a single factory, there are drippers, which are installed on threaded adapters, allowing direct connection to sprinkler heads. This makes the transformation of a plant very easy. If you want to supply water to more than one factory, you need a multi-outlet manifold. These can also be screwed directly onto the sprinkler head.
